

# Crocoduck Mania: How People Insist upon Misunderstanding Evolutionary Biology

Thursday October 11, 2012 • 5:30pm • Humanities 110

Free and Open to the Public

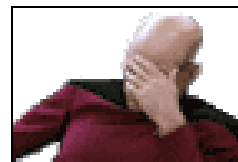

**Professor James R. Hofmann**  
CSUF Liberal Studies Department

Spend an hour with Hofmann's  
Creatures:

crocoducks, platypuses,  
mudskippers, cytochrome-c  
amino acid sequences and so  
much more.

Why are there so many  
fallacious arguments about  
these topics and how can we  
resolve them?

Sponsored by the CSUF Center for the History and Philosophy of Science, Technology, and Medicine
